Kimto Manufacturing Co. Ltd. is a Division II structural steel company with over 35 years of experience in the structural steel trade. They have built condos, convenience stores, warehouses, mezzanines, and everything in between.

Kimto Manufacturing specializes in the design and build of Rugged Conveyor Systems, custom fabricating, and repairs. They have an extensive knowledge in designing and building some of the industry's most rugged conveyor systems, used for almost every application imaginable--from sand and gravel to gold, bentonite, and diamonds. They know what industries can--and will--throw at their equipment, so they build them rugged and tough to ensure they will last!

Jeremy and Randy conduct business in the City of Wetaskiwin because the community is great and the people who live here are amazing. The City is in a perfect location for logistics, being centrally located to many great amenities. This strategic advantage keeps their business competitive, and the large amount of skilled local labour has also contributed to Kimto's success. Wetaskiwin is Working for Kimto Manufacturing.
